

Highland Origins Coffee – Mountain Harmony Blend Producer Datasheet

Premium Quality, Rich Heritage

Product Overview

Mountain Harmony Blend by Highland Origins Coffee is crafted for connoisseurs seeking a unique flavor profile and consistent quality. Sourced from ethically managed farms, our blend combines select beans from high-altitude regions, roasted with precision to enhance their natural aroma and taste.

Coffee Profile

Attribute	Details
Producer Name	Highland Origins Coffee
Blend Name	Mountain Harmony Blend
Origin	Colombia, Ethiopia, Guatemala
Altitude	1,200–2,000 meters
Varietals	Arabica (Typica, Bourbon, Heirloom)
Flavor Notes	Dark chocolate, citrus, red berries, floral undertones
Roast Level	Medium
Caffeine Content	1.2%

Quality Assurance

- Hand-picked cherries to ensure uniform ripeness.
- Triple-sorted: by hand, gravity table, and color scanner.
- Certified organic and Rainforest Alliance certified.
- Moisture content maintained at 11.5–12% for optimal shelf life.
- Regular cupping sessions by Q-graders with scores consistently above 85 points.

Processing Method

Step	Description
Harvesting	Selective hand-picking at peak ripeness
Washing	Fully washed with spring water

Fermentation	12–24 hours in temperature-controlled tanks
Drying	Sun-dried on raised African beds for 10–14 days
Milling	Mechanical hulling and polishing
Roasting	Small-batch, drum roasting at 200–220°C

Inputs

- Coffee Cherries: 100% Arabica, ethically sourced
- Water: Pure spring water for all washing and fermentation processes
- Energy: Solar-powered drying beds; roasting powered with natural gas
- Packaging Materials: Recyclable, multi-layer barrier bags with degassing valves

Packaging Information

Package Size	Type	Features	Shelf Life
250g	Foil bag	One-way valve, resealable	12 months
500g	Foil bag	One-way valve, resealable	12 months
1kg	Foil bag	One-way valve, resealable	12 months

Labeling & Certifications

- Batch number and roasting date printed on each bag
- Barcoded for traceability
- Certified Organic, Rainforest Alliance, and Fair Trade

Traceability, Sustainability, and Technical Data

Traceability & Sustainability

- Farm-to-cup traceability with QR code on every package
- Direct trade relationships with producers
- Annual impact reporting on environmental and social initiatives
- Biodegradable packaging and carbon-neutral shipping options available

Technical Specifications

Parameter	Specification
Bean Size	Screen 16–18
Defect Percentage	<1%
Moisture Content	11.5–12%
Water Activity	0.50–0.60 aw
Chlorogenic Acid	4–6 mg/g
Agtron Color	55–65 (Medium roast)

Storage & Handling

- Store in a cool, dry place away from direct sunlight
- Optimal storage temperature: 15–20°C
- Keep bag sealed when not in use to preserve freshness
- Do not freeze; refrigeration not recommended

Additional Information

- Custom blends available on request
- Private label and bulk packaging options
